## INTERNATIONAL LEAGUE GETS BUSY

Season Opens Today in Four Cities—President Barron Anticipates Successful Summer—New York and New Jersey League Clubs File Bonds—Red Sox Lose Another.

New York, April 15.—With threatening weather all over the east, the outlook is not bright for good baseball conditions to greet the teams of the international league tomorrow when the playing season of that organization begins. Otherwise the prospects of the league which in the east ranks next in importance to the major leagues are excellent for the season. President Barron declaring that he expects a prosperous year and a close contest with the race a close one. For the opening Montreal is scheduled to play Providence, Buffalo in Jersey City, Toronto in Newark, and Rochester in Baltimore.

**Chase Not Badly Injured.**

**Financial and Commercial.**  
A BEARISH DAY.  
Losses of from One to Two Points Sustained by Leading Issues.  
New York, April 15.—Quotations of stocks were again scaled down today. It was a traders market and traders were bearish. Losses of from one to two points were sustained by a long list of stocks, including such market leaders as Reading, Union Pacific, and Amalgamated. The higher prices for Americans in London before the opening here were ignored and initial prices were irregular. The list reflected the effect of bear selling for the time being. The market rallied but still lower prices were recorded before the close. The market was influenced unfavorably by further severe declines among the newer industrial and by heaviness of some of the standard investment stocks and bonds. Low prices were established by Pennsylvania, Petroleum and California Petroleum. New York Central's heaviness was ascribed to a report that the company was to put out a large note issue. The opinion was expressed that the success of the recent offerings of securities will have a large bearing on the outlook for the market. The decline of old established bonds since the outbreak of the war and the figures has tended to restrict investment buying and it was regarded as probable that the demand for favor with which the new issues are received will serve as an index to investment conditions. Some significance was attached to a sale of the new St. Paul 4-1/2 general mortgage bonds at a price of 102 1/2. Bankers said that western and southern banks were drawing down their New York reserves. The effect was not reflected in the local money market owing to the lightness of the demand for funds.
